### The Duckbill SPMM™ Platform

---

#### **Single Platform: Many Modules.**

Duckbill is a world leader in engineered **Single Platform: Many Modules** (SPMM™) concepts. SPMM™ is an ergonomically-sound professional carrying solution that uses a belt (with or without suspenders) that can be equipped with an array of customized modules for carrying hand tool, instrument and device modules.

This platform is typically used when over 10 pounds of gear is being worn.

### The Duckbill Agility™ Platform

---

#### **An outer and inner belt solution for carrying less weight.**

The Duckbill solution for carrying less than 10 pounds of gear is our **Agility Platform™**. This concept incorporates the use of an inner **Agility Anchor Belt™** and our **Agility Outer Belt™**. The Agility Anchor Belt™ is a belt consisting of soft leather on one side and industrial Velcro® wool on the other. This belt runs through the belt loops of work trousers. Our Agility Outer Belt™ consists of a nylon outside and Velcro® hook underside. All Duckbill modules sync-up with the outer belt utilizing our patented MaxCon™ docking technology, then the outer belt cross-links with the inner belt.

### The Duckbill MobilityMax™ Platform

---

#### **A platform that merges with existing fall-protection harnesses.**

Duckbill's independently suspended MobilityMax™ platform transforms all **Sala® ExoFit™ XP** fall protection harnesses and all **Sala® Delta® II** harnesses equipped with their optional Delta® Comfort Back Pad into a comfortable, safe, flexible and multi-purpose personal productivity platform.

MobilityMax™ is integrated seamlessly onto but does not impinge, abrade or interfere with the materials, design, integrity or functionality of the safety features of the harness itself because it syncs-up with the harness at the shoulder pads and on the rear yoke with our DorsalDock™. We are essentially making our Agility Platform™ available for use with the fall protection gear. Plus our front and rear struts provide an additional degree of suspension to the harness itself thereby aiding in the feel of the weight being carried.

For more detailed information, visit our website: [www.Duckbill-inc.com](http://www.Duckbill-inc.com)

## SPMM™ Utility Belts
