

## DUCKBILL SUSTAINABILITY INITIATIVE

### The Duckbill Reel Slabber is durable. But it doesn't last forever.

The Duckbill Reel Slabber is made from a tough composite of engineered thermoplastic and fiberglass. It's very rugged and dense material that makes the tool last longer and hold an edge longer than conventional plastics. And it's very difficult to re-process. Until now!

#### Save money on your next order:

Participate in the Duckbill Sustainability Initiative and earn *.50 on each returned tool.*

#### Here's how:

- 1) Any Duckbill customer, regardless of volume is eligible to participate.
- 2) Simply box up and return any used Duckbill Slabber/Opener tools to Duckbill at:

**Duckbill Paper Strippers**  
1324 Lake Drive SE  
Grand Rapids, MI 49506

- 3) Complete this document and include it in the boxed shipment you return to us.
- 4) On your next order, we'll deduct .50 for every Reel Slabber you return to us.
- 5) It might be a good idea to give a copy of it your accounting department.
